DECLARATION

This is to certify that the information provided in this nomination document and any other attachments is correct, to best of my knowledge. I also submit that I am authorized to submit this nomination for the CSI Nihilent e-Governance Awards (CNeGA) 2018 under the category - 'e-Governance State'. I have no objection in sharing the success story and the associated data with Computer Society of India and /or it's other authorized entities. Permission is also given to publish the said content as may be required by CSI SIG eGov or its nominee on their web site/s as well as in other media.

Our nomination submission confirms our agreement to the CSI Nihilent e-Governance Awards short listing process as outlined on the Awards website or as communicated. We also confirm our availability for providing clarifications, participation during 'field visit' by CSI SIG eGov team and in the 'Finalists' presentations if short listed at any stage. If our nomination is selected for an award under this category, either myself or a Senior rank official would personally participate in the awards ceremony.

Date:

Signature and Seal

1.0 State Summary

ICT interventions by State Governments, Central Government by way of e-Governance initiatives, 'Digital India' programs etc are considered as key drivers that contribute to the success of the efforts towards overall economic growth and well being of citizens.

"e-Governance States", usually present (a.) a long term digital strategy that is articulated by national and local considerations, (b.) a governance framework that can sustain transformation and (c.) measurable impact i.e., data-driven and evidence based, outcomes that reflect on excellence in the initiatives – policy, strategy and rollout.

1.1	Key aspects of the State's e-Governance Road Map for next five years
1.2.	Present distinct examples of state level policy Integration including State level Institutional partnership plans (International and National, start-ups) to support and drive the Transformation journey.
1.3	Briefly state specific key challenges faced during your eGovernance journey unique to your State and steps/ plans for overcoming them.

2.0 Result Indicators

2.1	Please identify and BRIEFLY DESCRIBE TOP THREE sectors / departments which delivered significant beneficial outcome to their targeted stakeholders due to strategy driven ICT interventions
2.2	Present distinct examples of integrated common service delivery thru resource sharing between departments due to State level policy/ strategic interventions.
2.3	List and elaborate KEY / SIGNIFICANT eGovernance best practices unique to your state that have emerged due to efforts of policy directions, system architects, leadership teams

3.0 Enabler Indicators

Progress in the above results areas is a cumulative effect of many enablers. From ICT perspective enablers at a State level could include - Policy support, standards and institutionalization of processes and adaptation for Business Process Reengineering, Change Management, Project Management, Capacity Building, Leadership, Cyber Security etc. Nominee is requested to present below a minimum of three strong 'enablers' that helped / continue to help in the journey of digital transformation at State level.

3.1	State level (Non project specific) e-Governance enabling processes [Nominee is requested to address aspects like: how has the state made it easy for departments to initiate new eGov projects, How easy [in terms of process steps] is it for departments to get funding?]

3.2	State level initiatives towards Capacity building for eGovernance [Nominee may look at items like existence of virtual cadre programs? Quality of exchange of knowledge among districts and departments etc]

3.3	Technology & Technology promotion with focus on emerging technologies relevant for the State/UT
	[Nominee may address aspects such as plans for use of emerging technologies e.g. Enterprise architecture, Data Analytics, Cloud, AI/ML, IoT, Cyber Security, eWaste management etc with transition/ adaptation plans]

4.0 Other information relevant for the nomination

[Nominee may provide additional information with regard to the State getting recognized at State level for any of the ICT interventions, bench mark initiatives, in the area of e-Governance proliferation, sustenance, efforts towards replication etc]

4.1	Awards and recognitions at State level for eGovernance initiatives

4.2	State specific eGovernance success stories case studies Publications - references

4.3	Specific gap areas – Policy level, process level, Technology level that State plans to pursue and improve

4.4	Any Other information that Nominee desires to share
